PROFESSIONAL SUMMARY

Detail-oriented and motivated Software Test Engineer with 2 years of experience in manual and automated software testing, specializing in the healthcare domain. Proficient in using tools like Selenium, TestNG, and JIRA to ensure software quality. Adept at developing and executing comprehensive test plans, identifying and resolving defects, and collaborating with cross-functional teams to enhance software functionality and user satisfaction. Seeking to contribute to a dynamic team in delivering high-quality software products.

Key Skills

Testing Tools Frameworks: Selenium WebDriver, TestNG, Maven, JIRA, Postman, API Testing Programming Languages: Java, SQL Testing Methodologies: Functional Testing, Regression Testing, Integration Testing, Smoke Testing, Performance Testing Development Methodologies: Agile (Scrum, Kanban), SDLC Additional Skills: Strong analytical and problem-solving skills, attention to detail, excellent communication, and collaboration.

Experience

Software Test Engineer
AppOrbis Technologies

Aurangabad, MH
April 2023 –
Present

- Designed and executed automated test cases using Selenium WebDriver and TestNG, enhancing test efficiency by 30
- Conducted functional, regression, integration, and smoke testing, ensuring comprehensive test coverage.
- Collaborated with cross-functional teams to identify, reproduce, and resolve software defects, improving release quality.
- Participated in product design and development discussions to ensure quality requirements were integrated early in the lifecycle.
- Conducted API testing to validate back-end functionalities and improve system integration.

Software Test Intern
AppOrbis Technologies

Aurangabad, MH
Nov 2022 – April
2023

- Developed and maintained detailed test documentation, including test plans, test cases, and defect logs, ensuring traceability and test coverage.
- Assisted in performance and scalability testing to validate software under high-load conditions.
- Used JIRA for defect tracking and reporting, improving issue resolution rates.

Projects

Automated Web Testing for Health Care Platform

github.com/name/repo

- Created robust automated test cases for functional and regression testing using Selenium WebDriver and TestNG.
- Designed a Page Object Model (POM) framework for efficient and reusable test scripts.
- Configured Maven for build and dependency management.
- Conducted cross-browser testing to ensure compatibility across platforms.

Education

BAMU University

June 2016 – May

Bachelor of Computer Science

2019

- Percentage: 66%
- Relevant Coursework: Software Testing, Computer Architecture, Comparison of Learning Algorithms, Database Management Systems (DBMS), Web Technologies

Certifications

- ISTQB Certified Tester (In-progress)
- Selenium Automation Testing – Advanced

Achievements

- Improved test coverage by 25% through the implementation of automation frameworks.
- Successfully reduced critical defect turnaround time by collaborating closely with development teams.
